SUMMARY

Java Backend Developer with hands-on experience building scalable backend applications using **Spring Boot, REST APIs, MySQL, and Redis**. Developed secure authentication systems using **JWT and OAuth2**, improving API response time by **80%** through caching optimization. Experienced in **Docker-based deployment, CI/CD automation, and Selenium-based automation tools**. Strong foundation in **Java, OOPs, and Data Structures & Algorithms**

TECHNICAL SKILLS

- **Languages:** Java (Core, OOPs, Collections)
- **Backend Frameworks:** Spring Boot, Hibernate (JPA), RESTful APIs, Spring Security (JWT, OAuth2)
- **Databases:** MySQL, PostgreSQL, Caching (Redis)
- **Tools & DevOps:** Docker, Git/GitHub, Postman (API Testing), GitHub Actions (Basic CI/CD)

EXPERIENCE

Java Developer Intern | Elevate Labs | Remote

Nov 2025 – Dec 2025

- Learned and developed backend applications using **Java, Spring Boot, and REST APIs**, following industry-standard development practices
- Implemented **JWT-based authentication** and tested REST APIs using **Postman**, ensuring secure user access.
- Built an **automation tool using Java and Selenium WebDriver** to extract multi-page Spring Boot documentation, remove unwanted UI elements using JavaScript, and merge chapters into a **single structured PDF using Apache PDFBox**.
- **GitHub:** <https://github.com/Siddhantkr19/SpringBoot-Doc-Scraper>

Operating Engineer | American Axel Manufacturing Company | Pune

Aug 2022 – Aug 2023

- Worked in a **team-driven production environment**, improving workflow efficiency and operational coordination.
- Strengthened **problem-solving and teamwork skills** through real-world engineering operations.

PROJECTS

LibHub | Hyperlocal Marketplace (Live) Technologies: Java SpringBoot, MySQL, React.js, Redis, Docker, Github Action.

- **Problem: Manual visit-and-pay** library booking system caused delays, seat conflicts, and **lack of digital management**
- **Solution:** Built a full-stack **library seat-booking** platform using Spring Boot and React.js with secure transaction and booking workflows
- **Security & Performance:** Implemented **JWT, Google OAuth2**, and BCrypt authentication, and integrated **Redis caching** to reduce read API latency by **80%**
- **Deployment:** Containerized application using **Docker** and automated CI/CD pipelines using **GitHub Actions** for reliable production deployment
- **Live:** <https://libhub.live>
- **GitHub :** https://github.com/Siddhantkr19/Hazaribagh_Libraries-LibHub-

AI-Powered Internship & Job Aggregator Technologies: Java Spring Boot, MySQL, React.js, Selenium WebDriver.

- **Problem:** Students manually searched multiple job portals, leading to time loss and missed opportunities
- **Solution:** Developed an **AI-powered job aggregator** that automatically scrapes job portals at scheduled intervals using Selenium
- **Automation & Intelligence:** Integrated **Google Gemini AI** to convert unstructured scraped data into clean JSON and built secure **JWT-based REST APIs** with role-based access
- **User Experience & Deployment:** Designed responsive **React (Vite)** frontend with real-time API integration and deployed the system using **Docker**
- **Live:** <https://iwp-pearl.vercel.app>
- **GitHub :** <https://github.com/Siddhantkr19/InternshipWithPutul-Backend->

EDUCATION

B.Tech in Computer Science and Engineering (CSE)

Vinoba Bhave University, Hazaribagh

Jun 2023 – Jun 2026

CGPA: 8.0
